## **UNLOCKING THE MYSTERY OF HOW WOMEN THINK, FEEL AND DESIRE**

There are a million sayings and assumptions about the differences between men and women:

- Treat a woman with respect and you will receive respect back.
- Women are complicated, men are simple.

- Women are from Venus; men are from Mars.
- Women want to talk; men want to do.
- Women want love, men want sex.

Each gender seems to spend a lifetime and a lot of money trying to figure the other one out. Why did she do that? What did he mean when he said that? Why did she leave? Why didn't he call? We are truly a mystery to each other. What if I told you that you could unlock the mystery to what women think, feel, want, hate, love, desire, and more just in one book? You would probably be pretty interested in getting your hands on it. Well, you're in luck. This book, "How to Treat a Woman" aims to teach you more about women, their inner thoughts and feelings, and teach you how to enhance and enrich your emotional and sexual relationships with them. All it will take is a little bit of your time and dedication.

In this book we are going to talk about a wide variety of different subjects, from female sexual anatomy to body language to masturbation to fantasies and desires. You won't be left wanting more after reading my book, I can promise you that.

A woman is many things and can be defined in many ways. Some women are wives, others are girlfriends, and others single. Some are mothers, some hope to be one day, others choose not to have children, and some cannot. Some are career women, others are students, and others are homemakers. Some women ooze sexuality, others are mysterious, and others still might choose a life of celibacy. We

could go on and on discussing the many different things that women can be, but one thing is clear, they are not easily defined or put into a box. So, for a man who wants to learn how to treat a woman, how do you know “what a woman wants?”

Women are many things. They are more than just sexual beings. They want more than just sex, but love, conversation, sensitivity, affection, and genuine interest. You can't fake your way into a woman's heart. In this book I will shed light on the subject, sometimes making generalizations, but always recognizing that all women are different and special. You'll begin by learning more about women and what makes them tick.
